

【JGPセミナー I ～XII 開講のお知らせ】

Dr. Duncan W. Brown

President, Pacific Tech Link, LLC, USA
Guest Research Associate, Kyoto University

Title: *Preparation for the Next Stage*

A Corporation or A Start-up, with some Application to Academic Life (I)
Financial Statements and Project Valuation

Abstract: Successful transition from the University to the Corporation requires scientists and engineers to learn new skills related to how “value” is perceived within a corporation. Not only does one’s work need to be of high scientific quality, the value of the work is measured in its contribution to the survival of the corporation. Since a corporation survives only if it is profitable, we will need to learn to “follow the money” from initial capitalization to return to the shareholders so that we can determine the financial health of the company. We will then examine in more detail the cost of research and product development projects and the criteria used by corporate management to value and ultimately select projects consistent with the company’s long-term strategy.

Time & Date: 13:15-14:45, Oct. 20・27 (Thu)

15:00-16:30, Nov. 2 (Wed)

13:15-14:45, Nov. 10 (Thu)

Lecture room : A2-308 (Katsura Campus)

※物質機能・変換科学分野 及び 分子工学専攻以外の融合コース、又は専攻で修了単位として認められるかどうかは、
Aクラスター事務区教務掛にご相談下さい。
