Prepare for Your Future

Whether it be in a Corporation, Start-up, with Application to Academic Life (I)

Measuring contributions in ¥

Successful transition from the Graduate Student Life requires scientists and engineers to learn new skills related to how “value” is perceived. Not only does one’s work need to be of high scientific quality, the value of the work is measured by its contribution to the survival of the corporation or start-up. Regardless whether a company is large or small, the company survives only if it is profitable. We will need to learn to “follow the money” from initial capitalization to return to the shareholders so that we can determine the financial health of the company.
