Prepare for Your Future – the Corporation or the University

Measuring contributions in ¥

Abstract: Successful transition from Graduate Student Life into the future requires scientists and engineers to learn new skills related to measuring “value.” Value is not only the scientific quality of your contribution, but also determined by your work’s contribution to the success of the organization. A key skill is to learn how to “follow the ¥” from initial budget allocation, grant or capitalization to the return to the stakeholders. By following the ¥, students will learn how the financial statements (profit & loss, balance sheet, cash flow) tell the story of financial health and prospects for the organization’s future. These are the same skills that financial managers use to evaluate stocks for investment or you will use in your personal finances. No previous knowledge necessary.

Lecture Dates: (Time): 10/16 ・ 10/23 (15:00-16:30)

Review Lecture & Problem Solving: 10/16 ・ 10/23 (16:30-18:00)

Room : A3-024 (Molecular Engineering Seminar Room)

※物質機能・変換科学分野 及び 分子工学専攻以外の融合コース、又は専攻で修了単位として認められるかどうかは、Aクラスター事務区教務掛にご相談下さい。
